

Helm

CLARUSWAY®  
WAY TO REINVENT YOURSELF

Helm

Helm is the package manager for Kubernetes

CLARUSWAY®  
WAY TO REINVENT YOURSELF

## Three Big Concepts

A **Chart** is a Helm package. It contains all of the resource definitions necessary to run an application, tool, or service inside of a Kubernetes cluster.

A **Repository** is the place where charts can be collected and shared.

A **Release** is an instance of a chart running in a Kubernetes cluster. One chart can often be installed many times into the same cluster. And each time it is installed, a new release is created.
